Introduction

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

INTRODUCTION

a. 2011 Premium Rates Summary

To create stable and competitive premium rates for the future, the WSIB Board of Directors has decided that modest increases to the average premium rate of 2 per cent for 2011 and 2012 are required, with the additional condition that no rate group's premium rates will be decreased. The Board of Directors has acknowledged an immediate need for modest premium rate increases, along with action from within the WSIB to slow the growth of the unfunded liability (UFL) and ensure premium revenue covers the full cost of benefits for workers. A financially prudent approach to ratesetting, along with responsible management actions, will ensure the long-term financial sustainability of the workplace safety and insurance system.

As noted in the Auditor General's 2010 Annual Report, the rate increases for 2011 and 2012 represent a necessary first step toward addressing the WSIB's UFL over time. The increases, along with legislative amendments and a major funding review being led by Professor Harry Arthurs, should help to ultimately reduce premiums by achieving a sufficiently funded system.

The UFL is now more than \$12 billion, and its rise can be attributed to artificially low premium rates and increasing benefit costs. Benefit costs have outpaced premium revenue increases by five per cent each year since 1999.

Between 1996 and 2009, premium rates have actually fallen by 25 per cent in absolute terms. The WSIB needs to improve its financial situation by eliminating the UFL and moving towards a sufficiently funded system. Full funding is the standard for most other Canadian workers' compensation systems. With a sufficiently funded system, future benefits are secure and employer premiums are lower.

The average premium rate is determined through an actuarial process, and is used as a base number to create individual rate group rates through the application of rate-group-specific claims frequency and cost information. It is not an average of the 154 rate group premium rates. Almost half of all registered employers will see no premium rate increase for 2011, while other employers with a history of costly injury claims may see increases of up to 1.0% of their payroll costs.

b. The Role of the Workplace Safety and Insurance Board (WSIB)

The WSIB helps workers deal with the consequences of workplace injuries and illnesses – providing a comprehensive bundle of insurance benefits and helping them recover and return to work.

The WSIB:

- Promotes health and safety in workplaces to prevent and reduce the occurrence of workplace injuries and occupational diseases
- Assists in the return to work and recovery of injured and ill workers
- Provides benefits to injured and ill workers and to the dependants of workers who
 have died as a result of a workplace injury or illness

The WSIB is a statutory corporation created by an Act of the Ontario Legislature in 1914. The WSIB is responsible for administering the *Workplace Safety and Insurance Act*, 1997 (WSIA). The Ministry of Labour is responsible for administering the Occupational Health and Safety Act.

The WSIB receives no government funding. WSIB premium revenue must cover all costs associated with both new and existing claims. Revenue is also raised through returns on invested assets and revenue in excess of 7% is available to reduce the UFL.

Employers covered by the WSIA, are divided into two groups, referred to as "Schedule 1" and "Schedule 2." Schedule 1 employers are insured under a "collective liability" system, and are required to contribute to the WSIB Insurance Fund. Schedule 2 employers are "self-insured," and are individually liable for the full costs of their workers' WSIB claims. The WSIB pays insurance benefits for Schedule 2 workers and is reimbursed by Schedule 2 employers for costs (including administrative costs) of the claims.

This Premium Rates Manual pertains to Schedule 1 employers only.

c. Funding Review

The WSIB is moving forward with a Funding Review to ensure the long-term financial stability of the WSIB. The Funding Review will be chaired by Professor Harry Arthurs, former Dean of Osgoode Hall Law School and President Emeritus of York University.

By engaging in a third-party review of the system, the WSIB is dedicated to being open and transparent about the review process and its findings.

The WSIB's projected UFL – the difference between payments for future benefits to workers and funding received from business – has risen due to low premiums, rising claims and health care costs and declining investment returns following the recent economic downturn. Right now, the fund is only large enough to cover about half of the projected costs in the system.

The goal of the funding review is to establish a dialogue and seek input from employers of all sizes, from workers and unions, and from other interested parties on a range of public policy issues relating to the WSIB's financial future. This includes appropriate funding levels for the WSIB, a timeline for eliminating the UFL, and the current premium-rate-setting methodology.

Through this dialogue and evaluation of alternatives, the Funding Review is intended to work towards building a consensus around the best path to follow and to inform WSIB strategies moving forward. This consultation is expected to conclude in November 2011.

d. Derivation of the 2011 Premium Rates

The Schedule 1 costs of the workers' compensation system are funded through premium rates, which are applied to the payroll of Schedule 1 employers. All Schedule 1 employers are not charged the same rate. Rather, for the purpose of charging them on an equitable basis, employers are classified into rate groups. Rate groups are defined in a classification scheme and each rate group has a different premium rate, reflecting the inherent risk of the specific business activities of industries insured within that group.

The classification scheme divides business activities into nine broad classes, which are further subdivided into 154 rate groups based on similarity of business activity and relative risk. Information about changes to the WSIB classification scheme can be found in Section 8 of this manual. Additional details about the classification scheme itself can be obtained from the WSIB's *Employer Classification Manual (ECM)* on the WSIB website, www.wsib.on.ca.

For each of the classes and rate groups defined in the classification scheme, the WSIB derives a premium rate to cover expected costs relating to the upcoming 2011 premium year. These costs include:

- a) The expected future lifetime costs to pay benefits and claims-related administrative expenses associated with all new claims for the premium year;
- b) The WSIB's expenses to administer the WSIA, the Ministry of Labour's expenses to administer the Occupational Health and Safety Act, the Workplace Safety and Insurance Appeals Tribunal, Offices of the Employer Advisor and the Worker Advisor, and the expenses of the Safe Workplace Associations and research; and

- c) Past claims cost, including charges:
 - to retire the WSIB's unfunded liability;
 - for gains and losses, which take into account the actual claims cost experience
 of a class, as compared to what was originally priced for specific injury years. For
 the 2011 premium rates, the gains and losses component reflects actual
 experience for injury years 2004 through 2009; and
 - to cover bad debts expense. This is recognition by class of uncollectible premiums on employer accounts, after all avenues for collection have been exhausted.

Premium rates are determined annually. Rates are expressed as a dollar amount per \$100 of insurable earnings, and the change from 2010 as a percentage of payroll costs.

An annual maximum ceiling for average earnings used for determining benefits and premiums is set each year according to the *Workplace Safety and Insurance Act*. The ceiling for the premium rate year (2011) is based on 175% of the average industrial wage for Ontario from the most recent published Statistics Canada earnings data available on July 1st of the previous year (2010). The 2011 maximum insurable earnings ceiling is \$79,600, an increase of 2.6% over the 2010 ceiling of \$77,600.

Although many rate groups had their 2011 premium rates remain the same as in 2010, the nine industry classes play a significant role in rate setting. The class level is where certain costs are projected using data and assumptions particular to each class. After the class estimates have been determined, estimates are derived for the rate groups of each class. The 2011 premium rates are based on a projection of claims experience and insurable earnings data from the most recent six years – that is, for the period from 2004 through 2009 inclusive.

There are many assumptions used when determining premium rates for the classes, including assumptions that relate to the economy. For instance, changes in the level of employment and earnings of a class are two factors that can influence the insurable earnings estimate for the class. The WSIB bases its assumptions of future insurable earnings on sector-specific information received from organizations such as Informetrica*, modified with input from other WSIB sources.

^{*} Informetrica is a privately-owned Canadian company specializing in quantitative economic research. Its products and services provide comprehensive coverage of Canadian economic prospects and public policy.

The WSIB's class-by-class forecast economic assumptions (as determined in March 2010) are shown below.

Economic Assumptions Supporting the 2011 Premium Rates					
Class	Earnings Growth 2009-2010	Earnings Growth 2010-2011	Employment Growth 2009-2010	Employment Growth 2010-2011	
Class A: Forest Products	0.48%	1.34%	-2.87%	-2.34%	
Class B: Mining and Related Industries	-0.24%	0.84%	0.99%	0.90%	
Class C: Other Primary Industries	1.60%	1.40%	0.84%	0.70%	
Class D: Manufacturing	2.42%	1.17%	-0.03%	0.43%	
Class E: Transportation and Storage	1.76%	1.14%	-1.51%	0.69%	
Class F: Retail and Wholesale Trades	2.31%	2.54%	0.67%	0.88%	
Class G: Construction	1.64%	1.22%	2.59%	2.39%	
Class H: Government and Related Services	3.64%	2.54%	2.55%	1.69%	
Class I: Other Services	2.53%	2.29%	0.81%	0.87%	
Schedule 1	2.60%	2.00%	0.90%	1.00%	

e. Classification Scheme and Data Sources

Schedule 1 employers are divided into nine classes (denoted by class codes A through I). Employers within each class are then subdivided into rate groups. The grouping of employers within a single rate group is based on similarity of business activities and/or relative risk. The number of rate groups in each class varies according to the size of the economic sector covered by each class. For example, Class B: Mining and Related Industries, contains four rate groups, whereas Class D: Manufacturing, contains 73 rate groups.

Rate groups are further divided into classification units. Classification units are used as a means of tracking the relative experience of various employer subgroups. Firms in a classification unit share similar business activities, risks or other characteristics. All employers within a single rate group, no matter which classification unit they belong to or their payroll size, are charged the same premium rate (before any merit adjustments or experience rating). Premium rates are not calculated for classification units.

The classes referred to in this manual should not be confused with industry sectors, which is another categorization used by the WSIB to compare common business practices and approaches.

The figures shown in the Supporting Documentation sections of this manual are based on the data available as of June 2010. Employers may obtain more recent information by contacting the WSIB (see Section 11 of this manual for contact information).

f. Realignment of Safe Workplace Associations

To align prevention partner efforts and achieve improved outcomes, the Occupational Health & Safety Council of Ontario (OHSCO) initiated a Roles Review and Realignment project in the spring of 2008. The Safe Workplace Associations (SWAs), WSIB and Ministry of Labour recognized the need to create a future "system that responds in a flexible, active way to emerging problems." The new prevention system would be marked by:

- A streamlined SWA model:
- The maintenance and enhancement of sector-specificity in the front lines;
- Integrated planning;
- Consolidated "strategic services"; and
- One website (a common system access point) and one integrated and aligned communication and marketing plan.

As a result of streamlining, the 12 existing SWAs have been amalgamated into four new ones:

Former	
SWAs	Description
CSAO	Construction Safety Association of Ontario
ESAO	Education Safety Association of Ontario
EUSA	Electrical & Utilities Safety Association
FSA	Farm Safety Association
IAPA	Industrial Accident Prevention Association
MASHA	Mines and Aggregates Safety and Health Association
MHSA	Municipal Health and Safety Association
OFSWA	Ontario Forestry Safe Workplace Association
OSACH	Ontario Safety Association for Community & Healthcare
OSSA	Ontario Service Safety Alliance
PPHSA	Pulp and Paper Health and Safety Association
THSAO	Transportation Health & Safety Association of Ontario

New	
SWAs	Description
IHSA	Infrastructure Health and Safety Association
PSHSA	Public Services Health and Safety Association
WSN	Workplace Safety North
WSPS	Workplace Safety & Prevention Services

In terms of industry coverage, IHSA primarily encompasses employers in the construction, transportation, and electrical industries, PSHSA focuses on the education, health care, and municipal sectors, with a critical mass of Schedule 2 employers, WSN covers forestry, mining, and pulp/paper industries, and WSPS includes the farming, manufacturing, and service sectors.

The 2011 premium rates reflect the SWA realignment in that a rate group pays a share of the Schedule 1 expenses for one of the four new SWAs instead of for one of the 12 former SWAs.

Summary of Allocation Rules

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

SUMMARY OF ALLOCATION RULES FOR 2011 PREMIUM RATES

A. New Claims Cost

New claims costs are determined at the class level. However, rate groups belonging to a class pay them.

The share of the class new claims cost charged to a member rate group is based on the expected number of claims, the average cost of a claim expected for that rate group and a loading for future claims administrative costs of new claims for the premium year.

The average cost of a claim for a rate group is determined via a Cost Index, which indicates the relative costliness of an average claim for the rate group as compared to the cost for its class.

B. Overhead Expenses

Overhead expenses are allocated to rate groups in proportion to their new claims cost and insurable earnings.

Rate groups covered by a particular Safe Workplace Association (SWA) pay a proportionate share of the expenses of that SWA.

C. Past Claims Cost

1. Unfunded Liability

The Unfunded Liability (UFL) charge is determined for Schedule 1 as a collective whole. However, rate groups pay it.

The share of the UFL charge paid by rate groups is in proportion to their new claims cost.

2. (Gain)/Loss

Gains and losses are determined at the class level and spread over a period of six years. If the actual claims cost experience of a class was better than its expected experience then a gain is generated for that class. Conversely, when the actual experience was worse than expected, there is a loss. For the 2011 premium rates, gains and losses are based on injury years 2004 through 2009.

A gain results in a reduction in premium rates while a loss results in an increase.

The gain or loss of a class is allocated to its rate groups in proportion to their new claims cost.

3. Bad Debts

Bad Debts charges are determined at the class level based on experience from the five years 2005 to 2009.

The share of the Bad Debts charge paid by rate groups is in proportion to their premium.

SECTION 9

Non-Credible Rate Groups

Workplace Safety & Insurance Board

Commission de la sécurité professionnelle et de l'assurance contre les accidents du travail

NON-CREDIBLE RATE GROUPS

Ideally, each rate group defined in the Workplace Safety and Insurance Board's classification scheme should be credible, that is, large enough so that reasonably reliable estimates can be made for deriving premium rates from a rate group's own claims experience. Although this is generally the case, particular industries or services in Ontario can decline substantially as the economy undergoes changes and this can lead to a situation where a previously credible rate group becomes non-credible. In addition, some rate groups have reduced the number of injuries to a level where there is not enough information available to estimate the average cost of a claim and, as a result, the rate group becomes non-credible. As part of the ongoing activity of rate making, the Workplace Safety and Insurance Board (WSIB) monitors the credibility of rate groups.

When the WSIB is concerned that a particular rate group has become non-credible, and is likely to remain non-credible, the WSIB may decide to remove such a rate group from the classification scheme through some form of rate group merger, as of a specified date. Employers in the affected industries or services would continue to be insured, but under another rate group.

Since the original development of the WSIB's current classification scheme, which was introduced in 1993, a number of rate groups have become non-credible. Different approaches have been used to address the issue of non-credibility, depending on the circumstances of each rate group.

Data supporting the 2011 premium rates shows that under current criteria four rate groups are not fully credible.

It is possible that the experience of some of the non-credible rate groups may return to a fully credible level, eliminating the need for additional review. However, it is expected that for some of these rate groups, the lack of credibility would need to be addressed more formally by the WSIB, possibly through reclassifications or rate group mergers.
